WORK EXPERIENCE

LTM (LTIMindtree)

Aug 2025 – Present

Full Stack Developer (Consultant)

Pune, India

- Improved React.js application performance by **15–20%** through optimized components and efficient state management.
- Streamlined rendering of large datasets using memoization and virtualization techniques.
- Replaced a third-party solution with a custom-built system, achieving **65%** cost savings
- Developed an automated API testing platform reducing execution time from **15 minutes** to near real-time.
- Deployed backend services on AWS EC2 with a highly available and scalable RDS setup, handling **5K requests/sec**.

Moonwyre Software Private Limited

Jul 2025 – Aug 2025

Backend Developer

Bangalore, India

- Optimized FastAPI endpoints with caching, reducing response time by **85%** and delivering **7 times** faster performance.
- Applied System Performance Tuning by streamlining serialization to eliminate a **51%** bottleneck.
- Built asynchronous REST APIs using concurrency techniques, improving performance by **20%**.
- Improved backend scalability by **30%** by implementing LZ4-compressed data storage and efficient caching.
- Reduced test suite runtime to **25%** of the original by optimizing Pytest workflows.

Ramanujan Universe

Jun 2024 – Jul 2024

High Performance Computing Research Intern

Noida, India

- Engineered interactive dashboards in React.js to visualize HPC workload metrics.
- Applied data and model parallelism to optimize large-scale training workloads by **30%**.
- Enhanced CPU/GPU utilization and memory management, boosting system scalability by **40%**.

EDUCATION

Jaypee University of Engineering and Technology

Jul 2021 – Jun 2025

Bachelor of Technology in Computer Science and Engineering | CGPA 8.7

Guna, MP, India

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript, SQL

Libraries/ Frameworks: React.js, Next.js, Redux, Node.js, Django, Flask, FastAPI

Tools/ Platforms: Git, GitHub, Docker, Pytest, CI/CD, Bash, Linux

Technical Skills: Object-Oriented Design, Data Structures and Algorithms, Software Design Patterns, Cloud Computing (AWS EC2, RDS)

Databases: MySQL, PostgreSQL, MongoDB, Redis

ACADEMIC AND PERSONAL PROJECTS

ERP Artifact Automation System | FastAPI, Next.js, Celery, Redis, PostgreSQL | [GitHub](#) | [Live](#)

Oct 2025 – Nov 2025

- Built FastAPI backend with OData APIs and **OAuth 2.0** authentication to manage artifacts and system operations.
- Architected PostgreSQL schemas for scalable, reliable artifact storage and fast query performance.
- Implemented **Celery** for asynchronous processing with Redis as broker and caching layer.
- Integrated **CI/CD** pipelines using Jenkins, automating testing, deployment, and delivery process.

School Management Application | React.js, Node.js, Redis, NoSQL | [GitHub](#)

Jan 2025 – May 2025

- Developed a full-stack school management platform to manage records and workflows via secure RESTful APIs.
- Used Redis for session storage and in-memory **caching** to boost performance and reduce latency.
- Configured **role-based access control** for students, teachers, and admins to ensure secure operations.
- Designed the system for **scalability** and **high availability** to support a growing user base and ensure high uptime.

Video Calling Application | Next.js, FastAPI, Flask, WebRTC, WebSockets | [GitHub](#)

Jun 2023 – Nov 2023

- Orchestrated a real-time video calling platform using WebRTC for peer-to-peer media streaming.
- Built signaling with WebSockets and scalable message delivery via Redis and caching to reduce DB load.
- Integrated offline speech recognition capabilities to ensure reliable functionality without an internet connection.

POSITIONS OF RESPONSIBILITY

Google Developer Student Club JUET

Aug 2021 – May 2023

Development Lead

Guna, MP, India

- Led the Development Wing at GDSC JUET, playing a key role in the hiring, mentoring, and development of new talent.
